DELIVERABLE 1 · 0.3 · US00001

Tray icon states

One mark, one corner badge. The badge shape carries the state, so it reads on a monochrome menu bar and without color. Up to date has no badge at all: the quiet state is the plain mark.

State	Win 16 · light	Win 16 · dark	Win 32 · light	Win 32 · dark	macOS template	16 px master ×4	Tooltip
Up to date Plain mark, no badge							Dispatch Mesh — Up to date
Working Saved locally · Shared as draft · Finishing up							Dispatch Mesh — Shared as draft (Team Wiki)
Offline Dimmed mark + slash. Calm, not red.							Dispatch Mesh — Offline, changes saved on this device
Needs attention Exclamation badge							Dispatch Mesh — Needs attention: 2 unresolved conflicts
Paused RESERVED — not in 0.3, needs ADR-0010							Dispatch Mesh — Paused (reserved)

Windows light taskbar #F3F3F3, dark #202020. macOS shown as a template image at 18 px: pure black + alpha, the badge glyph is a knockout so the system can tint it.

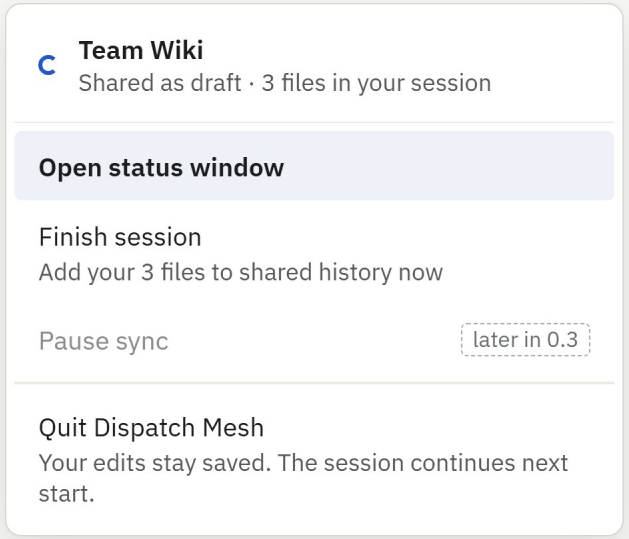

Screen readers get the tooltip text as the icon name. The 32 px column is a scale of the 16 px master; hint the 16 px pixels by hand before shipping.

DELIVERABLE 2 · 0.3

Tray menu

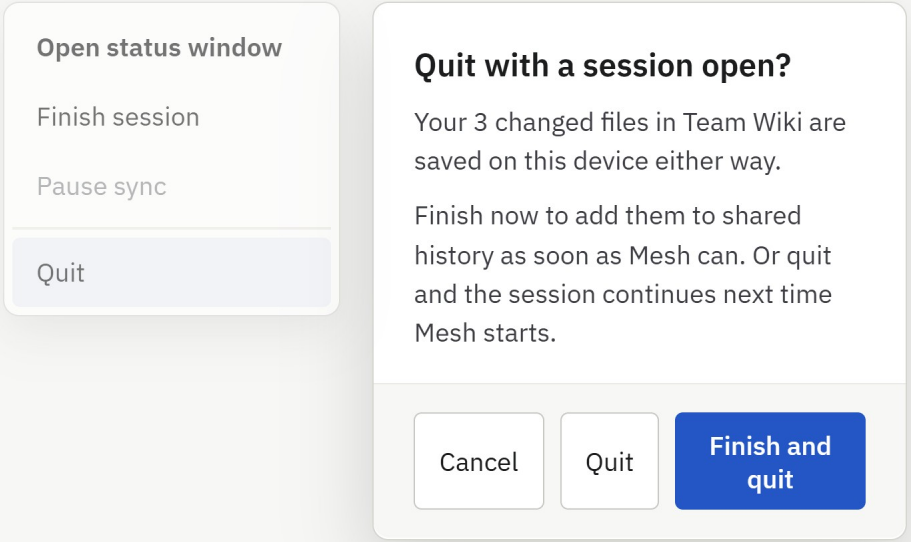

Left-click the icon opens the status window. Right-click opens this menu. Shown with an open session in Team Wiki.

Variant A · recommended Quit never prompts

Finish session sits right above Quit, so the choice is visible without a dialog. The hint under Quit answers "will I lose anything?" before it's asked.

Variant B Quit offers Finish session when one is open

Only appears when a session is open; otherwise Quit is immediate. Trade-off: a third button on every quit with unfinished work.

DELIVERABLE 3 · ADR-0010 WORKSPACE SUMMARY

One frame per summary state, highest precedence first

The card at the top is the only part that changes tone. Working states stay white and quiet; offline goes grey, not red; only Needs attention gets color and a primary action. The session list keeps the lower-priority activity visible.

Clarify setup steps and add troubleshooting examples

RA **Research agent** · agent on Bob's desktop · today 10:09

REQUESTED PURPOSE · BY RESEARCH AGENT

“Clarify onboarding for new colleagues”

Applies to 2 of 3 files. This is what the agent was asked to do, not a check of what it changed.

3 files

`onboarding/setup.md`	Requested purpose
`onboarding/troubleshooting.md`	Requested purpose
`index.md`	No purpose recorded

Stages

- Saved on Bob's desktop — 10:02
- Shared as draft — 10:03
- Finishing up · summary written — 10:09
- Added to shared history — 10:09

Discarded Your session at 9:41 · index.md. The edits cancelled out, so nothing was added to history.

Presence

From saved changes only. Advisory, never a lock. Each entry fades out 5 minutes after the last save.

In the activity list

A `meetings/2026-11-04.md`
Alice recently changed this file · 12 s ago

B `policies/retention.md`
Bob recently changed this file · 3 min ago

As a notice on the file

Alice recently changed this file
Last saved 12 seconds ago · meetings/2026-11-04.md.
You can keep editing. If you both change the same lines, Mesh keeps both versions.

Reserved: live editing (editor integrations) not in 0.3

Alice is editing now

Solid, filled pill vs. the dashed ring for recent saves, so the two signals never read as the same thing.

Team Wiki

Activity **Conflicts** 2

2 unresolved conflicts

Two people changed the same file. Nothing was overwritten: both versions are kept, and the current version stays in the folder until you choose. Other files keep syncing.

`policies/retention.md`
Text · recorded today 11:14

CURRENT VERSION · SHOWN	OTHER VERSION · KEPT
Alice · laptop saved 11:12	Bob · desktop saved 11:13

Review and choose

`assets/logo.png`
Image · whole-file choice · recorded today 10:51

CURRENT VERSION · SHOWN	OTHER VERSION · KEPT
Alice · laptop saved 10:48	Bob · desktop saved 10:50

Review and choose

policies/retention.md

Alice and Bob changed the same line within a minute. Pick the version to keep in the folder.

✓ Show common base

COMMON BASE Before both changes · shared history, 3 Nov `retention: 30 days`

CURRENT VERSION In the folder now

A Alice · laptop · saved 11:12

Requested purpose: none recorded

```
1   # Data retention
2
3   How long we keep exports from the shared drive.
4
5 ≠ retention: 60 days
6   owner: Operations
```

OTHER VERSION Kept, not shown

B Bob · desktop · saved 11:13

Requested purpose: none recorded

```
1   # Data retention
2
3   How long we keep exports from the shared drive.
4
5 ≠ retention: 90 days
6   owner: Operations
```

You saved this file again at 11:20, after the conflict was recorded. That edit is protected and reconciled separately once you choose.

Both versions stay in history whichever you choose.

Use other version · 90 days

Keep current version · 60 days

assets/logo.png

Images can't be combined. Choose which whole file stays in the folder; the other is kept in history as a saved copy.

Attention clears

Dispatch Mesh · Team Wiki

Team Wiki is up to date again

All conflicts are resolved and everything is shared.

Show a toast when

- A new conflict is recorded. Conflicts that arrive within 60 s are batched into one toast.
- A workspace enters Needs attention, or the reason changes to a new one.
- A workspace leaves Needs attention, and only if its start was toasted.

Never toast

- Going offline or back online. The tray and window say it calmly.
- Saving, sharing as draft, finishing up or publishing.
- The same workspace + reason again within 30 min, even if it clears and returns. The tray still updates.
- While Windows Do not disturb / Focus is on. Toasts land quietly in the notification center.

Toast text uses the engine's reason in plain words. No credentials, raw Git output or provider responses, ever.

DELIVERABLE 5 · 0.5 · FLOW-LEVEL SKETCH

Guided setup: three ways in, no Git knowledge needed

1 · Sign in
Account with the hosting provider. Opens the browser, returns here.

→

2 · What do you want to do?
- Create a workspace
- Join an existing workspace
- Connect a folder you already have

→ one of three paths below

Create a workspace

Where it lives
Pick your account or an organization you belong to.

→

Name and visibility
Name + private / visible to the organization. Shown before anything is created.

→

Local folder
Choose an empty folder, or make one.

→

Ready
Opens the status window on the first-run state.

Join an existing workspace

Pick a workspace
Only workspaces you can already access.

→

Local folder
Where the files should appear on this device.

→

Downloading
Progress by files. Interrupted downloads resume, no duplicates.

→

Ready
Up to date, history included.

Connect a folder you already have

Pick the folder
Mesh reads it, nothing changes yet.

→

Inspecting
Keeps your files and any history already there.

→

Review
Anything ambiguous is listed for you to decide. Never silently overwritten.

→

Ready
Then create or join as above.

Recoverable states, every path

Sign-in cancelled
Back to step 1, nothing created. “Sign in again”.

Access denied
Names the workspace, suggests asking its owner. No provider response shown.

Download interrupted
“Resume” picks up where it stopped. Files already here are kept.

Setup left halfway
Next start offers “Finish setting up Team Wiki”, without duplicates.

Optional · AI summaries (opt-in)

A · Provider
Hosted provider + key, or a local model.

→

B · Test
Sends a made-up sample, not your files.

→ **C · Consent**

STEP C OF 3 · AI SUMMARIES

Send session text to [Provider] for summaries?

Each time a session closes, Mesh asks [Provider] to write its history title and summary.

Leaves this device
- Changed text of files in the session
- File names in the session
- Requested purposes, if recorded

Stays here
- Files outside the session
- Images and other non-text files
- Your sign-in and keys

☐ I agree to send this text to [Provider] for Team Wiki. I can turn this off any time in AI settings.

Not now · use local summaries | Turn on AI summaries

The primary button stays disabled until the box is ticked. Skipping is a full answer: sessions still publish with a factual local summary.

DELIVERABLE 6 · TOOLKIT-NEUTRAL

Tokens and components

Flat fills, 1 px lines, one soft shadow for floating surfaces. Nothing a native toolkit can't draw. Fonts: IBM Plex Sans + Mono, falling back to Segoe UI / SF / Cantarell and Consolas.

Color

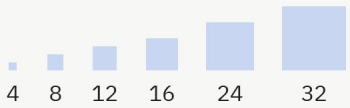

Token	Use	Light	Dark
`ground`	Window background	#F7F7F5	#1B1C1E
`surface`	Cards, menus, title row	#FFFFFF	#242528
`line`	Dividers, card borders	#E3E2DE	#34363A
`line-strong`	Secondary button border	#C9C8C3	#4A4C51
`text`	Primary text	#1C1D1F	#ECECEA
`text-2`	Body on cards	#3D3F44	#C4C5C8
`text-3`	Meta, timestamps, paths	#55575C	#A2A5AA
`action`	Primary buttons, links, focus	#2457C5	#7FA6FF
`synced`	Up to date, published	#2F6B4F	#6FBF97
`working`	Saved, draft, finishing	#2457C5	#7FA6FF
`offline`	Offline (calm grey)	#4A5568	#A7ADB8
`attention`	Needs attention, conflicts	#B4490B	#FF9E57
`attention-tint`	Attention card ground	#FDF1E7	#3A2618
`presence`	Recent-save presence ring	#7A4FB0	#B793E6

All text tokens pass 4.5:1 on ground and surface. Status tones pass 4.5:1 on their own tint, so a state label can sit inside its card.

Type

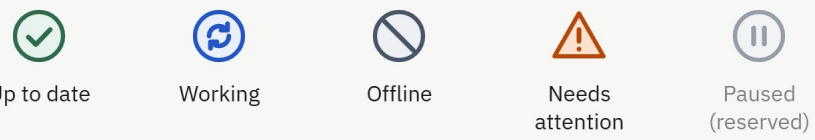

28 / 600	**Spec heading**
17 / 600	**Needs attention**
14 / 600	**Team Wiki**
13 / 400	Both versions of each file are kept.
12 / 400	Last synced 1 min ago
11 / 600 caps	**REQUESTED PURPOSE**
mono 12	`policies/retention.md`

Spacing and radius

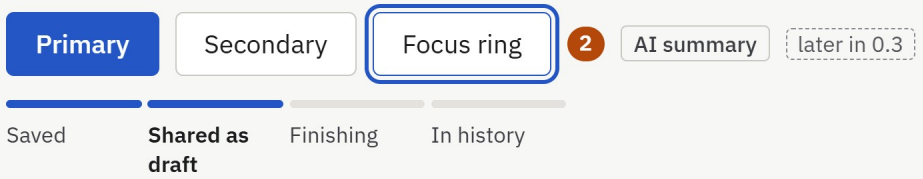

Radius 4 controls · 6 inner panels · 8 windows and cards · 999 pills

Status glyphs · 24 px, stroke 1.6

Components

Stage track: always paired with the stage name in text. Published = all four in synced green; discarded = a tag, no track.
